

DID YOU KNOW?

•Air pollution has impaired visibility nationwide:

•The average household consumes 10,000 kWh of electricity per year and generates over 11,200 lbs. of air pollutants each year.

•Power generation is responsible for 63% of sulfur dioxide, 22% of nitrogen oxides and 37% of mercury released into the environment.

•Air pollution contributes to the following health and environmental effects:

- Climate change
- Acid rain
- Ozone damage
- Haze and decreased visibility
- Asthma
- Bronchitis
- Emphysema
- Cardiovascular disease

COMPANY OVERVIEW

Conceptualized in 1997 and incorporated in 2002, SKY energy® Inc is a direct sales and marketing organization that provides wind energy nationwide to companies, institutions and individuals through *Wind-e™* Renewable Energy Certificates.

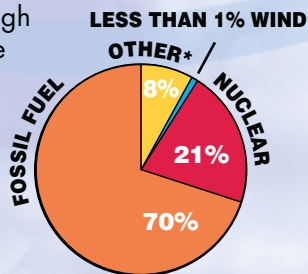

VISION AND MISSION

Creating a cleaner and more sustainable environment, one that benefits and continually improves individual health and environmental stewardship. Our mission is *providing clean, renewable energy for present and future generations.*

SKY energy® contributes to the growth of energy sources that are both *sustainable and emission free.*

Did you know that although wind energy is one of the cleanest forms of energy, it is currently less than 1% of our national energy production?

*Other (Biomass, Hydro, Solar, etc.)

SKY energy® wants to make it grow!

SKY energy® WIND-e™ RENEWABLE ENERGY

SKY energy® provides *Wind-e™* Renewable Energy, which is the independently certified environmental attributes and benefits of renewable, zero-emission wind energy as it is generated on the national power grid. By purchasing SKY energy® *Wind-e™* Renewable Energy, companies, institutions, and individuals can play an active role in reducing air pollution, while supporting the continued development of wind energy.

Each kilowatt hour generated by wind energy offsets over 1.4 pounds of air pollution based on the national power grid composition.

WHY BUY SKY?

- Clean energy production (zero-emission)
- Created from renewable source of energy
- Low-price due to high volume purchasing
- Consistency and predetermined quantities
- Increases independence from foreign energy
- Scalable technology to meet additional needs
- Credits are internally verified, certified, and registered
- Meets and exceeds EPA standards for emissions (Clean Air Act)
- Cost-effective because turbines are placed in optimal locations
- Flexible and customizable purchasing terms
- Available nationwide with no logistical barriers (location or regulation)
- Specialist expertise focusing in wind energy only
- Personal and attentive customer service
- Provides information measuring the impact of choosing wind energy
- Brand recognition leading to positive consumer, employee, and constituent experience.
- Supports the development of wind energy that displaces and offsets other polluting forms of energy

Independently Certified By
Green-E® a program of the
CENTER FOR RESOURCE SOLUTIONS

ADDITIONAL ADVANTAGES OF COMMERCIAL USE

- LEED certification points by the US Green Building Council (USGBC)
- Positive public perception and relations
- Meets and exceeds EPA standards for emissions (Clean Air Act)
- EPA Green Power Partnership
